Courtenay Transmission Service

The most recent MISO generator interconnection studies for Courtenay Wind show that the project will be granted 200 MW of Network Resource Interconnection Service (NRIS) upon the completion of all required transmission network upgrades identified in the GIA – the last of which is scheduled to go into service in 2020¹ NRIS, just like firm transmission service, allows the Company to obtain capacity from the Facility.

Additionally, the Company will obtain firm point-to-point transmission service from Minnkota Power Cooperative under its settlement agreement.

¹ Courtenay Wind Generator Interconnection Agreement Exhibit A10 - Contingent Facilities includes Proposed MVP Portfolio 1 - N LaCrosse-N Madison-Cardinal -Spring Green - Dubuque area 345-kV (345kV sections N. LaCrosse - North Madison - Cardinal which is scheduled to go into service in December of 2020.
